

Laptop Depot™ Product Family

Introducing the versatile Laptop Depot™. This product is designed as a unique expandable alternative to store smaller quantities of laptops, compared to its larger competitors, making it a less expensive storage and security device. This scalable storage unit is the perfect classroom solution, providing accountability by groups which means better tracking of laptops, as well as faster deployment, meaning students spend less time retrieving a laptop and more time learning on it.

Each unit is also stackable and can be placed side by side without cord interference, making it efficient at space utilization, even in small classrooms. The Laptop Depot™ is also adaptable, offering 3 different styles to suit any classroom need.

Laptop Depot™

- Stores and charges up to 5 or 8 laptops
- Five outlet UL power strip
- Mounting flexibility allows laptops to be stored in unobtrusive locations
- No timer needed
- Permanent mounting increases security
- Mount above or below a work surface
- Can be converted into a Pedestal or Cart

*Patent Pending

Laptop Depot Pedestal™

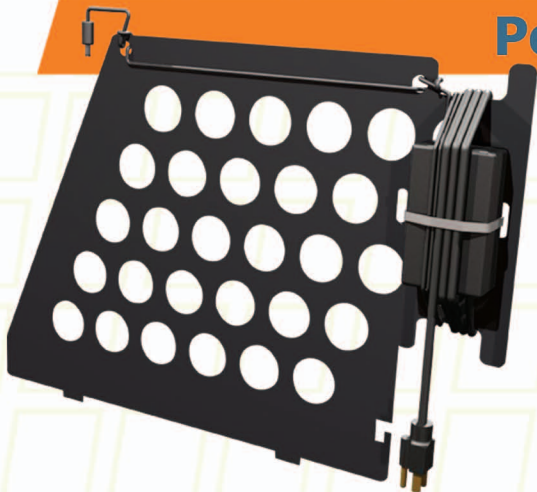

- Stores, charges, and transports up to 5 or 8 laptops
- Laminated top provides a smooth working surface
- 5 or 8 outlet UL approved power strip
- 2" nylon caster for classroom or office mobility
- Fits under a desk
- No timer needed
- Storage drawer for other peripherals
- Locking door and drawer for increased security

Laptop Depot Cart™

- Store, charge, and transport up to 5 or 8 laptops
- Laminated top provides smooth working surface
- 5 or 8 outlet UL approved power strip
- 3" caster allows for easy building mobility
- No timer needed
- Storage drawer for other peripherals
- Locking door and drawer for increased security

Power Management Divider (PMD)

- Provides a cord management solution by wrapping the laptop power supply cord neatly around the divider
- PMD installs in both the Laptop Carrier™ and all versions of the Laptop Depot™
- Dividers are removable to facilitate the storage of other devices
